Look at that boring
 Philidor?! The next several
 games are to show you how
 to develop techniques that
 hit your opponent
 blindspots. Having your
 pieces in the right places
 will always give you more
 than you planned for.
 When you go home and
 study your games, it's like a
 football player watching film
 for a big game. The really
 good players watch
 themselves too! I'm still
 learning weapons and they
 are becoming more and
 more dangerous because
 they are unusual or easy to

miscalculate. Any opening
 you are playing will become
 like that for you when you
 combine study and analysis.
 Pick an opening and stick
 with it for a while. Go over
 your games and you too will
 start finding secrets. The
 best part is the more you
 find the better they get!
 Send me your games!!
